

Project Name: I-595PPP (Public Private Partnership) Managed Lanes Projects

Location: Ft. Lauderdale, Florida

Owner: Florida Department of Transportation

Client: GLF Constructors, Inc.

Project Facts: A \$1.3 Billion Design-Build, operate and maintain PPP project. The project limits extend from I-595/I-75/Sawgrass Expressway interchange east approximately 10.5 miles to the I-595/I-95 interchange in central Broward County. The project

Services Provided: Worked directly with the prime contractors, designers and suppliers on the development of the design of the over 65+ bridges for the project. This included bridge demolitions, widening, replacements, braided ramps and also the construction of new interchange bridges at Florida's Turnpike. Produced take-offs and a detailed estimate using HCSS estimating software for all of the bridge structure for the project. Developed the initial project schedule for the roadway, walls, sheet piles for the canal work and bridge portions of the overall project using Primavera scheduling software.

When: February 2008 thru Present (Ongoing thru 2013)
