

Project Name: Eastbound Wakota Bridge over Mississippi River

Location: Minneapolis, Minnesota

Owner: Minnesota Department of Transportation

Client: Flatiron Constructors, Inc.

Project Facts: The \$56.4 Million is a cast-in-place post-tensioned cantilever bridge using travelers for the main span and the backspans will be cast-in-place on falsework.

Services Provided: Performed detailed concrete, formwork and post-tensioning take-offs and also provided them with a detailed estimate using HCSS Estimating Software. We provided information to the client's staff for activity durations for the project schedule and also provided feedback on constructability issues.

When: December 2007 thru January 2008
