

**Project Name:** IH61 Bridge over the Mississippi in Hastings, Minnesota

**Location:** Hastings, Minnesota

**Owner:** Minnesota Department of Transportation

**Client:** CH2MHill

**Project Facts:** Design of a 2,100 LF bridge over the Mississippi River on IH61 in Hastings, MN

**Services Provided:** Produced a detailed independent estimate for three bridge alternatives with a 540 foot proposed navigation channel. These alternatives included a cast-in-place balanced cantilever, steel tied arch and steel stay cable. A detailed equipment list and construction schedule was also produced in order to determine the cost of each alternative. The estimate assisted the owner in determining which alternative would be used in their upcoming design-build process.

**When:** April-May 2009
