

Project Name: Two Medicines River Bridge

Location: Browning, Montana

Owner: Montana DOT

Client: Obayashi

Project Facts: The US-2 Two Medicine River Bridge project will result in the replacement of the existing bridge over Two Medicine River on US Highway 2 (US2) located within Glacier county on the Blackfoot Indian Reserve in Montana. The existing bridge, built in 1941, is currently both structurally deficient and functionally obsolete. It is 761-feet long and crosses 150-feet above the Two Medicine River with 12-foot lanes and no shoulders. This project has two proposed alternatives: A Steel Truss option and a Precast Segmental option.

Services Provided: Performed detailed Quantity Takeoffs, Cost Estimate, and Project Schedule for both alternatives.

When: From June 2010 to August 2010
