

Project Name: Bonner Bridge

Location: North Carolina

Owner: North Carolina Department of Transportation (NCDOT)

Client: Skanska USA

Project Facts: The 2.5 mile existing Bonner Bridge which connects Hatteras Island to the mainland has fallen into a state of disrepair. NCDOT has authorized \$300 Million for the first phase of the design-build project to build a new bridge alongside the existing. The Skanska-Parsons team has proposed a segmental alternative using both span-by-span and cantilever precast segments.

Services Provided: Performed takeoffs for the superstructure, Detailed Estimate for Casting Yard and Superstructure Erection, Project Schedule, Precast Yard Layout, Procedure Drawings for Technical Proposal

When: From May 2011 to June 2011
