

**Project Name:** Mid-Currituck Bridge

**Location:** North Carolina

**Owner:** North Carolina Turnpike Authority

**Client:** VSL

**Project Facts:** The North Carolina Turnpike Authority has proposed a new 7 mile bridge crossing over the Currituck Sound from the mainland to the Outer Banks. The preferred alternate, C1, will be made up of 184 simple spans. VSL is has proposed a span-by-span precast segmental option for this alternative.

**Services Provided:** Assist VSL in validating their project cost estimate by putting together a comparison cost estimate in HCSS for the precasting and erection of the segmental superstructure.

**When:** From May 2011 to June 2011
